AT NO COST

The perfect starter

We can help you build your own cancer screening plan

SEE EXACTLY WHICH SCREENINGS YOU'RE DUE
FOR, WHEN YOU'RE DUE, AND HOW TO DO THEM.

Scheduling Assistant

10-15 MIN

Work with your Color care advocate to book appointments with primary care doctors, schedule in-person screenings like mammograms or colonoscopies, or find nearby specialists like oncologists or dermatologists. Forty-five minutes of elevator music can be draining. Use Color to handle the logistics.

Cancer Risk Assessment

10 MIN

Answer a few questions and Color will tell you what you need to be screened for and when — then help you get those screenings done.

Genetic Testing and Counseling

10 MIN

Learn how your genes impact your risk for cancer, heart disease, and medication response. Plus, get access to a genetic counselor to learn what you can do about it.

Have you already started using Color? Log into your account at color.com/teamsters to learn how your covered benefit can help you continue to stay on top of your health — and access the whole menu of options available to you.

Cancer support when you need it — *at no cost to you.*

Screening to-go

At-home tests that make it easy

JUST COLLECT A SAMPLE, SEAL IT, AND SEND IT
BACK TO THE COLOR LAB FOR ANALYSIS.

GET YOUR RESULTS IN THE SAME WEEK.

Cervical cancer screening kit

10 MIN

Served neat in a small collection cup. With Color, get a simple urine test you can do at home to screen for HPV, the leading cause of cervical cancer.

Colorectal cancer screening kit (FIT test)

10 MIN

An easier, private colorectal cancer screening that can be done from the comfort of your home. No preparation necessary — just collect a small stool sample.

Prostate cancer screening

10 MIN

A new take on an old classic. Screening for prostate cancer doesn't have to be invasive or uncomfortable. It's a simple blood test that you can do from home. Warm your arm, push a button, and a small vial will fill with a few drops of blood without you needing to touch a thing — you'll barely feel it.

Skin cancer virtual screening

10 MIN

In a few minutes, you can snap photos of any new moles or spots on your skin and upload it for analysis by a Color dermatologist. They can tell you what to be concerned about, and, if necessary, help you book an in-person appointment for a better view.

Already have a kit? It's easy to send it back. Open your kit and visit color.com/test/activate, collect your sample, and send it to Color for analysis.

Cancer care that covers it all, *from soup to nuts.*

===== *A generous helping* =====

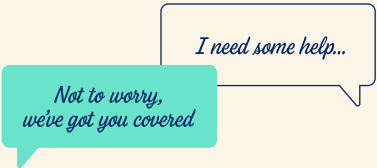

Color can assist you between visits

YOU DON'T HAVE TO MANAGE EVERYTHING ON YOUR OWN

Logistics

2 MIN

Plan time away from work, find the best in-network providers, and explore clinical trials and next steps. Color's logistics services can help you navigate the complexity of a recent and past cancer diagnosis for survivors, caregivers, and folks currently in treatment.

Check-ins between appointments

2 MIN

Get fast follow-up in 24-48 hours from the Color team so worries don't linger between visits.

Bills and Forms

2 MIN

Color can help you by calling insurance on your behalf and helping you understand medical bills, benefits, leave, and more — saving you time and energy.

“The big difference with Color is that they treat the whole person, not just the disease.”
— Nicole, Teamsters Member

Want to help your coworkers take proactive steps in their health journey? Join the Color Champions Club! Your encouragement can make the difference between someone delaying care or getting the support they need in time. Visit color.com/championsclub for more information.

Battling cancer can be *a long and winding road*

Find moments that feel normal

Optimize your sleep, movement, eating, and future screenings. Color can help build a plan so the food you eat tastes good, moving doesn't feel like too much, and you sleep during treatment. Color can help you choose a few steps to get started at your own pace.

Symptoms and side effects

You're never alone. If you have questions at any hour of the day, get 24/7 help with symptoms like nausea, sleep challenges, brain fog, or other shifts you've noticed.

Plan your next steps in care

Talk through future treatments, scans, or follow-up visits. Color helps you understand each step and what questions to ask at your next appointment. Color Oncologists can also help review and adjust your treatment plan to make sure you're getting the best care possible.

Understand long-term effects and survivorship

Ask about side effects that might linger, what to watch for after treatment, and what a follow-up plan might include. We'll put it into simple terms you can revisit anytime.

Support for your caregivers and circle

Bring a family member or friend into visits, or have them reach out with their questions. Color can help them understand your plan and how to support you.

Survivorship support

Work with Color to return to work after leave and create a 5-year post-treatment plan. Address the dietary, physical, logistical, and financial aspects of life after treatment.
